

PRIVATE TRANSPORT AND HOSPITAL SOLUTIONS

CUSTOMIZATION THAT COUNTS.

Medix Type I and Type III ambulances deliver the industry's highest possible performance value. Go safely, effectively, and efficiently with ambulance models that provide best-in-class delivery.

SAE

Of course, everything we build meets or exceeds industry safety standards.
All Medix ambulance models are designed, manufactured, and tested to current state specifiations.

EFFECTIVE

We know how to scale what works, and how to eliminate what doesn't.

Medix has opened 5 plants in less than 10 years, staffed by industry experts who stick around and are quick to implement customer requests and product improvements.

EFFICIENT

No decision fatigue – build within set modular configurations for customization that counts. CNC-produced components guarantee identical commonality across multiple units, with common parts almost always available same-day for service and warranty needs. Get best-in-class delivery on new ambulances and immediate turnaround on stock units.

FILL THE GAP. THEN REDEFINE IT.

Medix was founded in January 2001 in Elkhart, Indiana by Thomas Moleski and Floyd "Lacey" Lowery.

What started as a market-responsive need to lower manufacturing costs has grown into a mission to deliver the ambulance industry's highest performance value.

Nothing is safer, more effective, or more efficient than a first responder inside a Medix ambulance.

Nothing Comes Close.

- Grown to 5 plants in under 10 years.
- Outstanding structural integrity.
- Repeatable, reliable manufacturing.
- Top speed to market.
- Competitive price point.
- Highly invested dealers.

YOUR GO TO SOLUTION FOR PRIVATE TRANSPORT & HOSPITAL NEEDS

TYPE II TRANSITS

A total workhorse for ALS and BLS transport, featuring Whelen emergency, scene and load lighting for top visibility. Standard features include 3D/CNC produced wood cabinetry, HD welded steel curbside wall structure, high back tech seating and transverse 02 (Transit).

RP90 UNITS

Lightweight, heavy-duty response.
The Metro Express RP90ES provides the working clearance, rugged build quality, versatility, and manufacturing repeatability to lead everything from BLS to bariatric, CCT and ALS transport operations.

FESCO/MEDIX STOCK UNITS

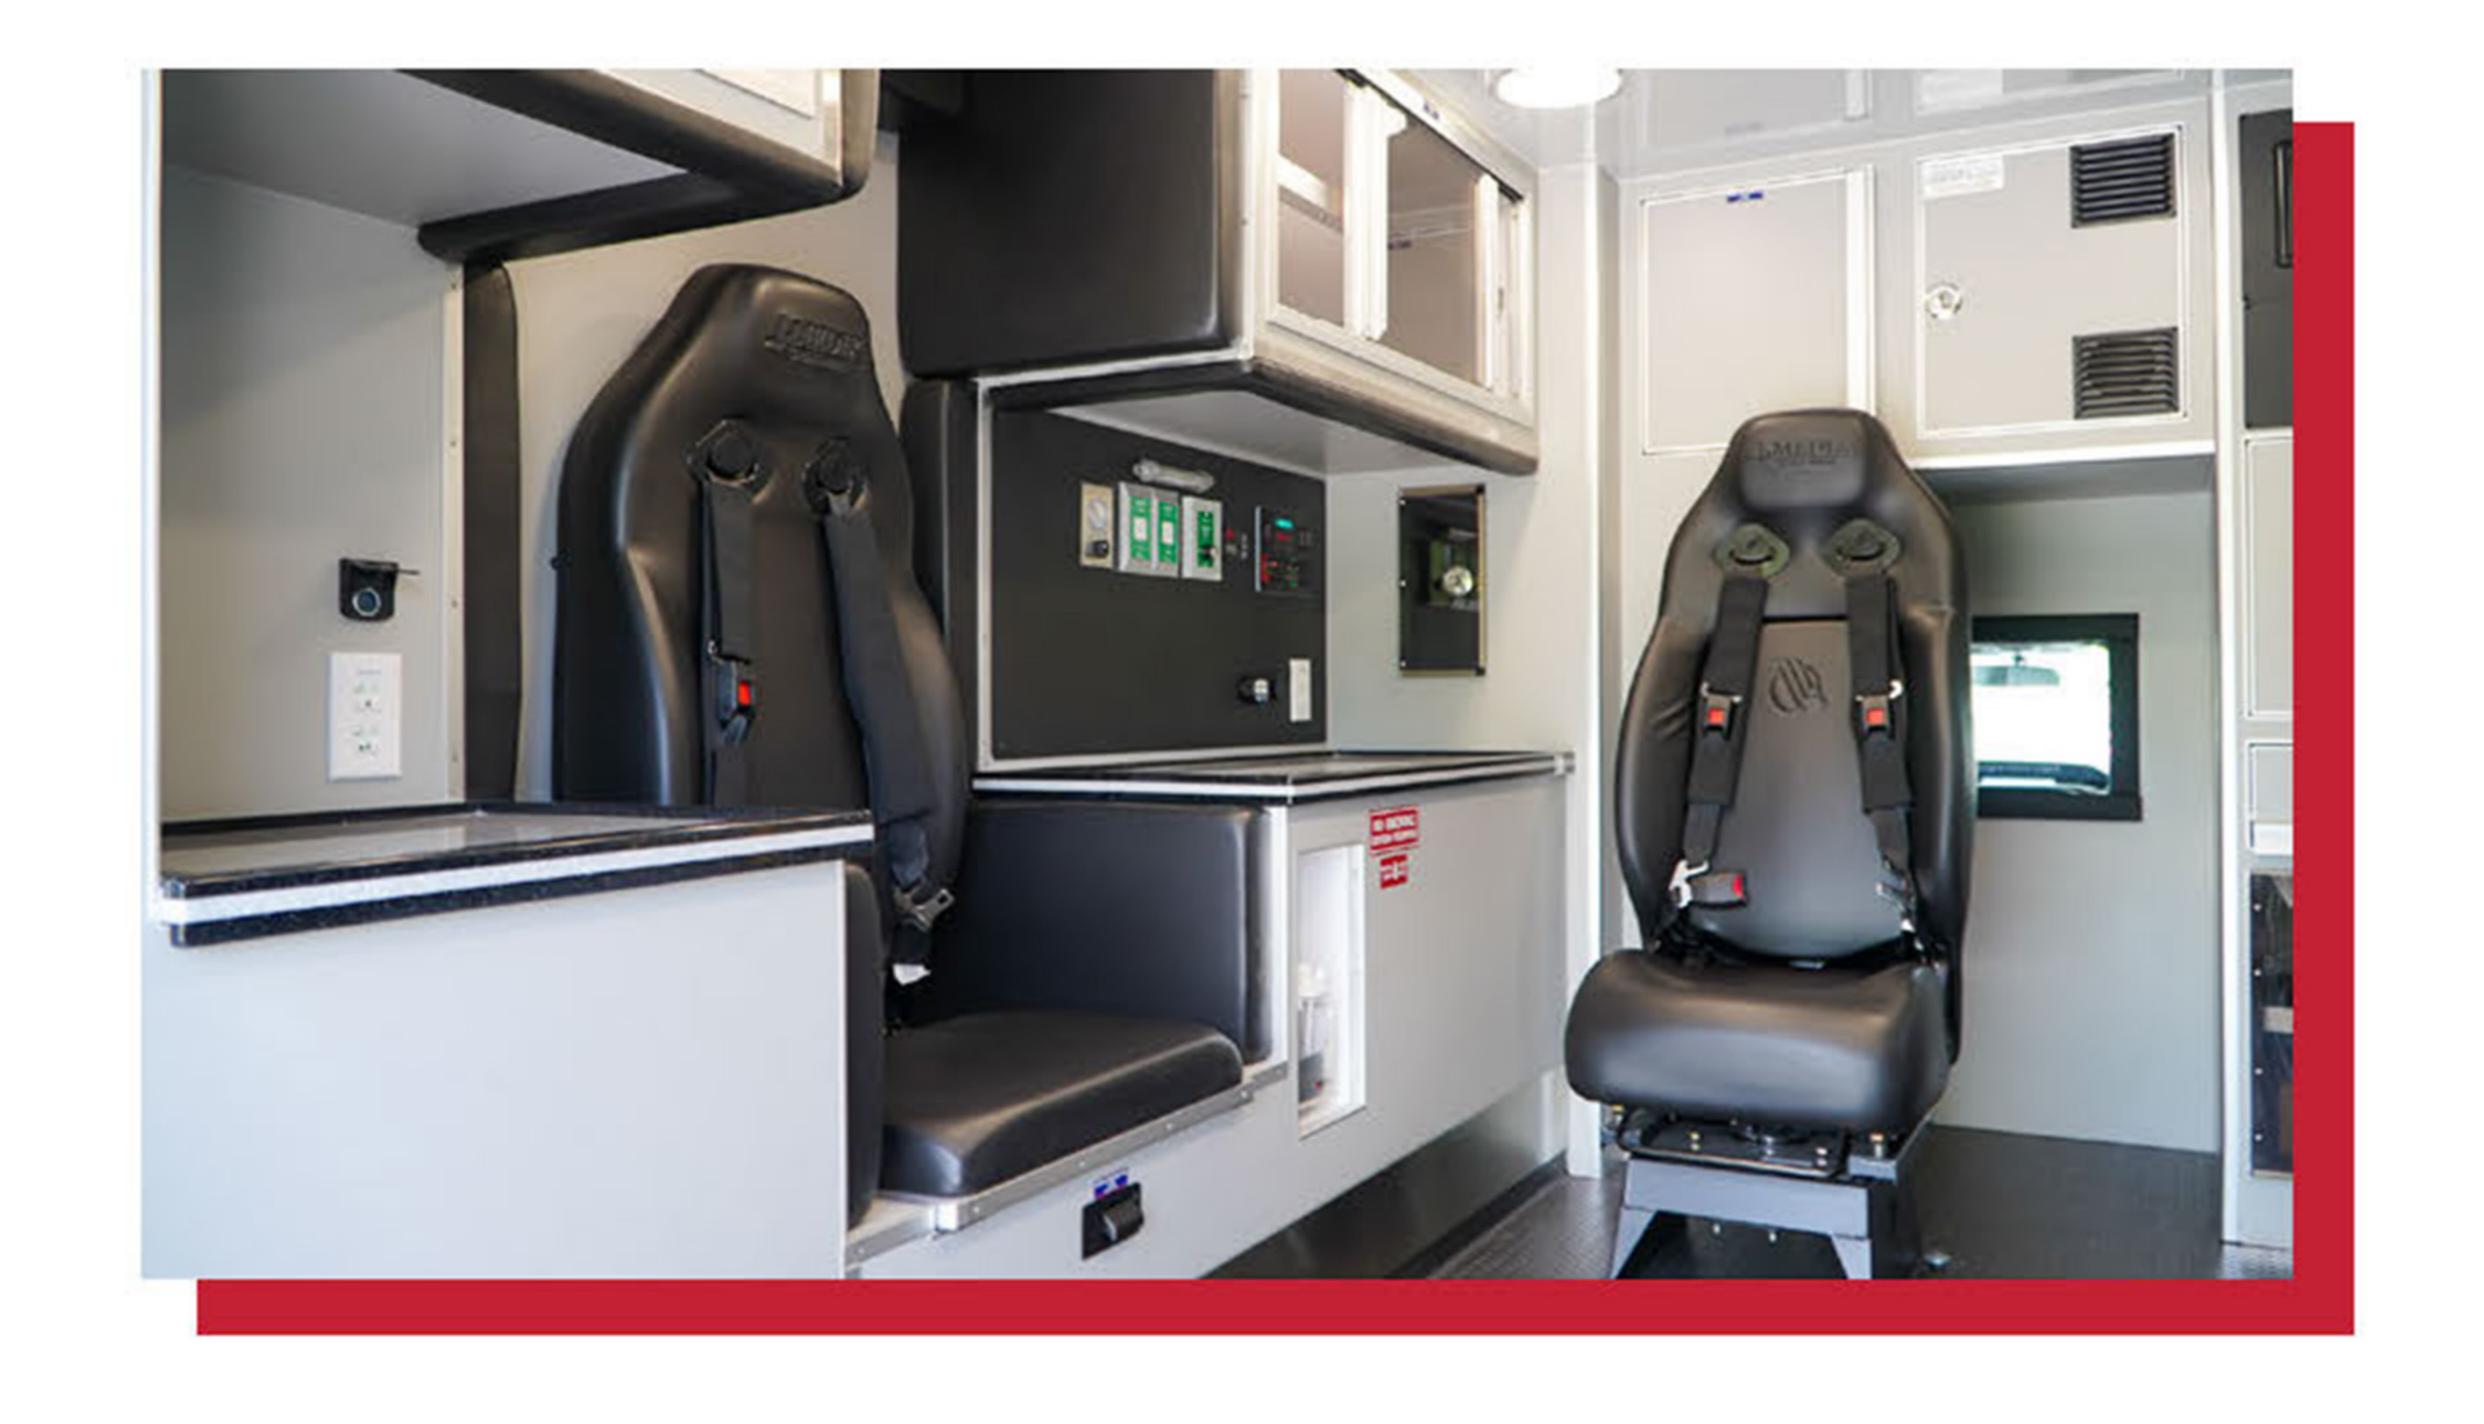

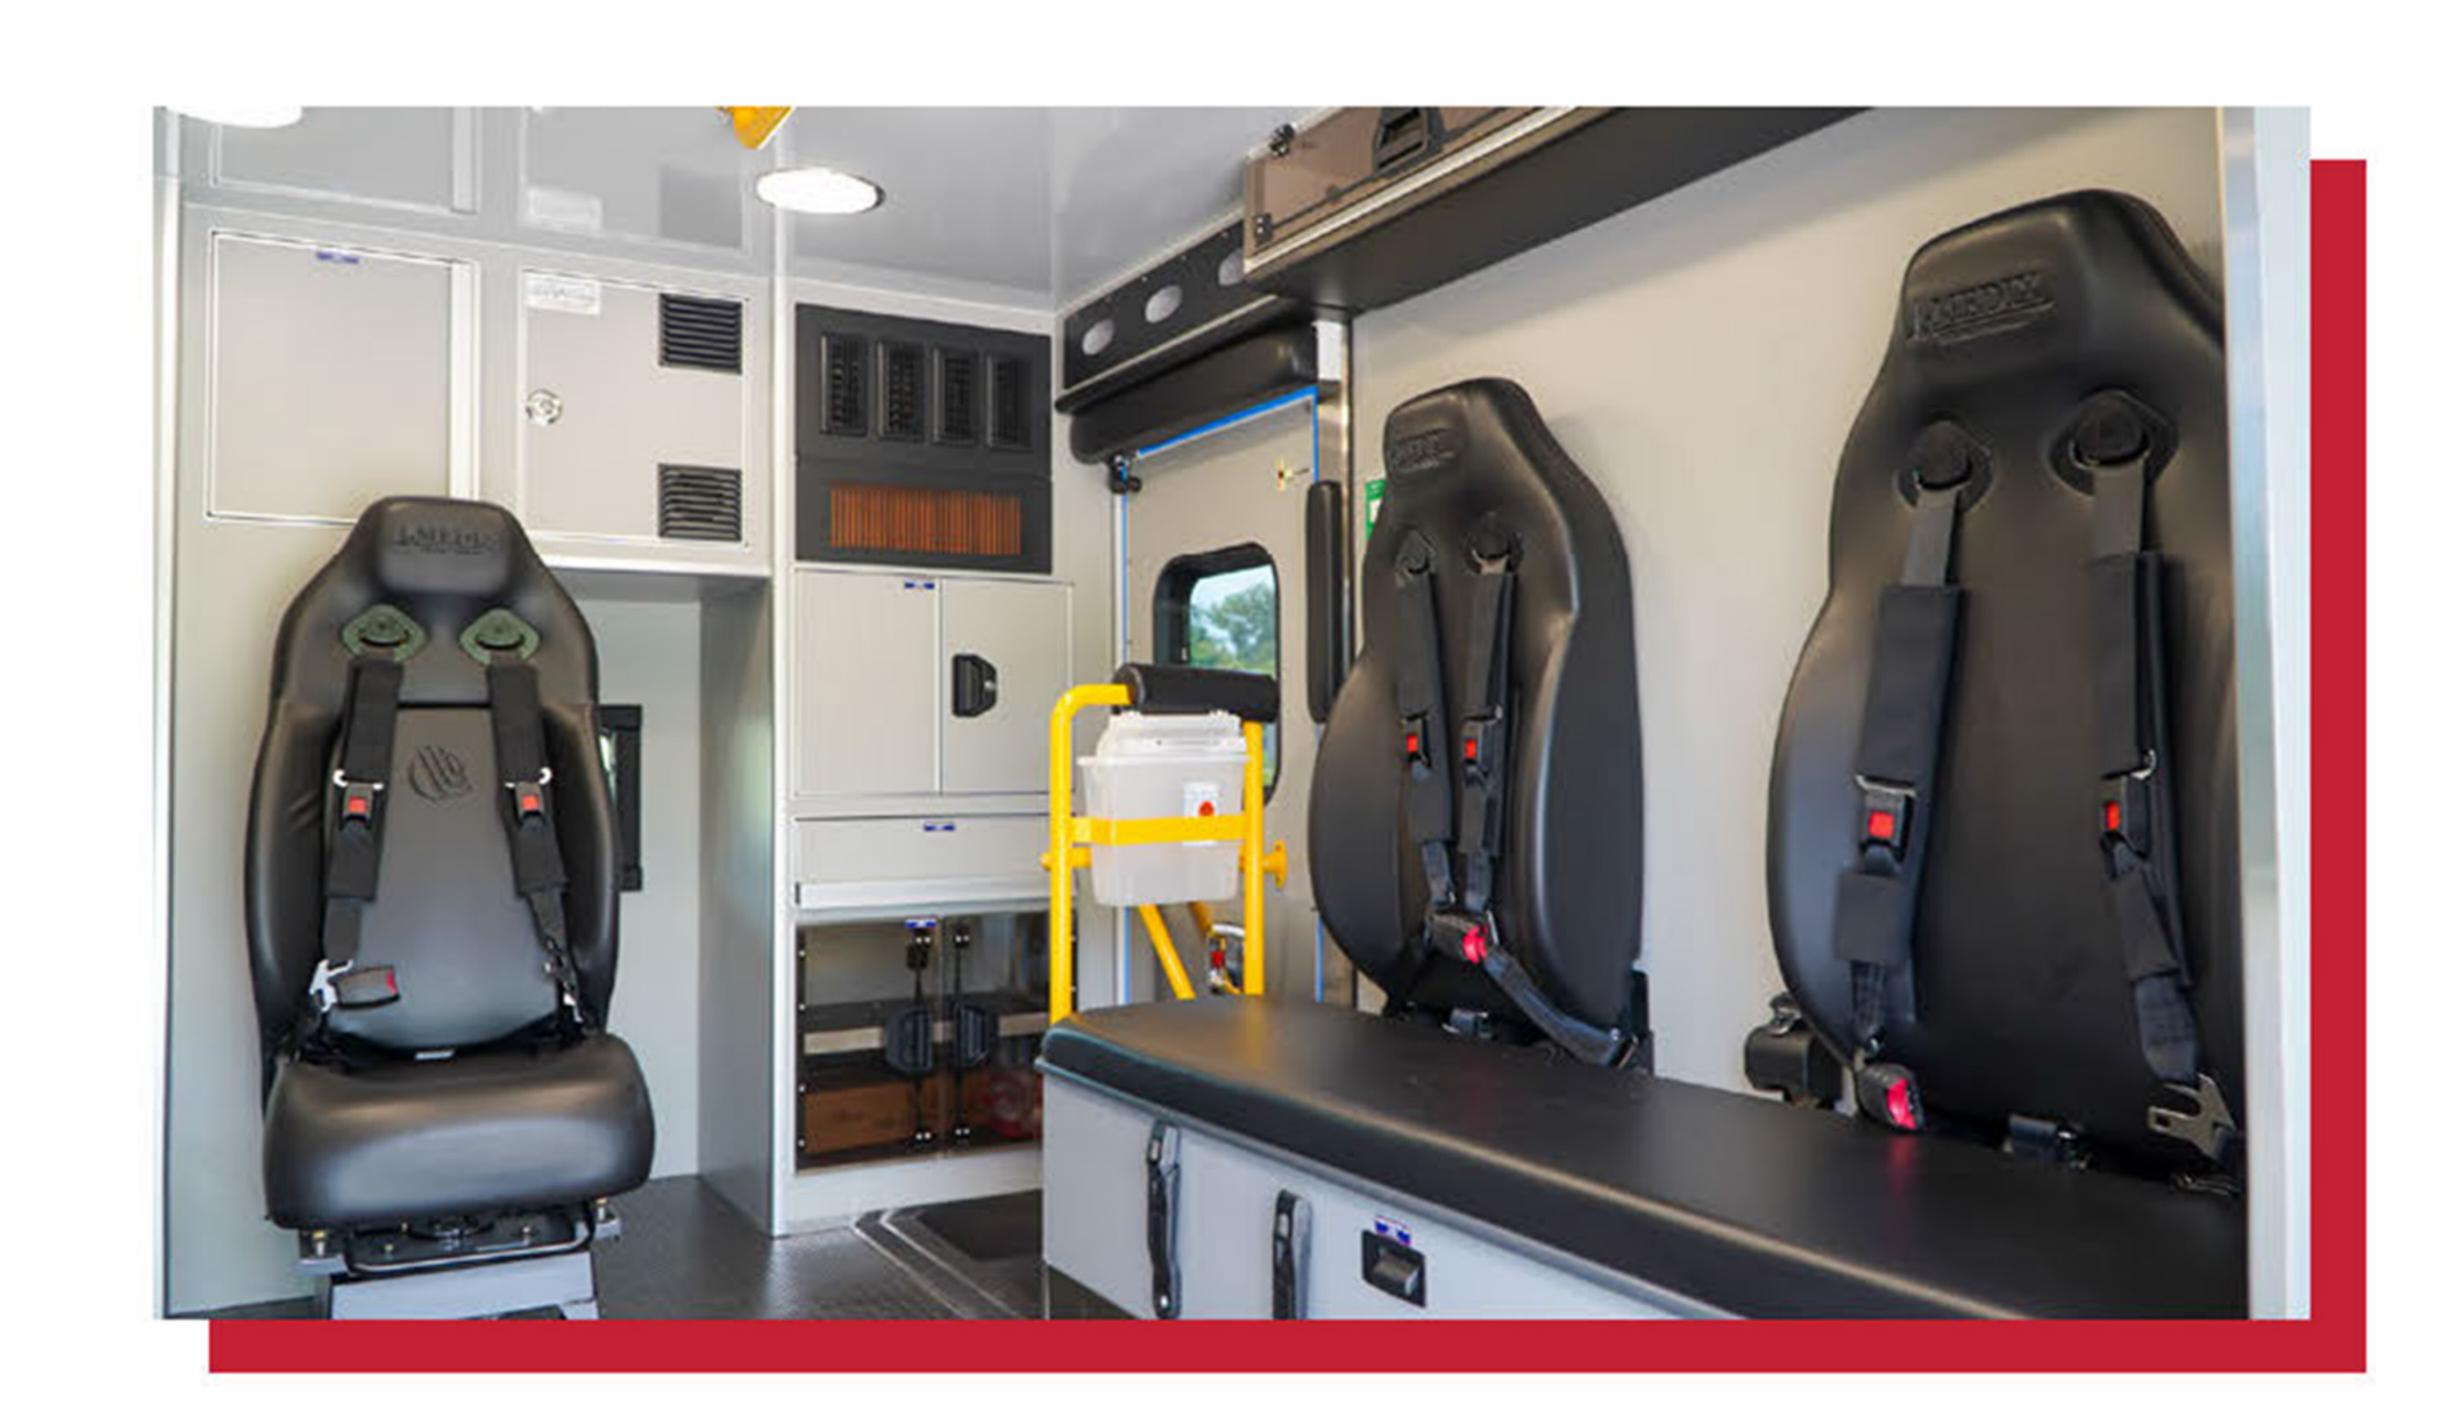

ME 157 UNITS

The Metro Express 157 makes the most of a mid-sized body offering hospital-based, municipalities and private ambulance services the ability to perform ALS and BLS functions with a modest footprint

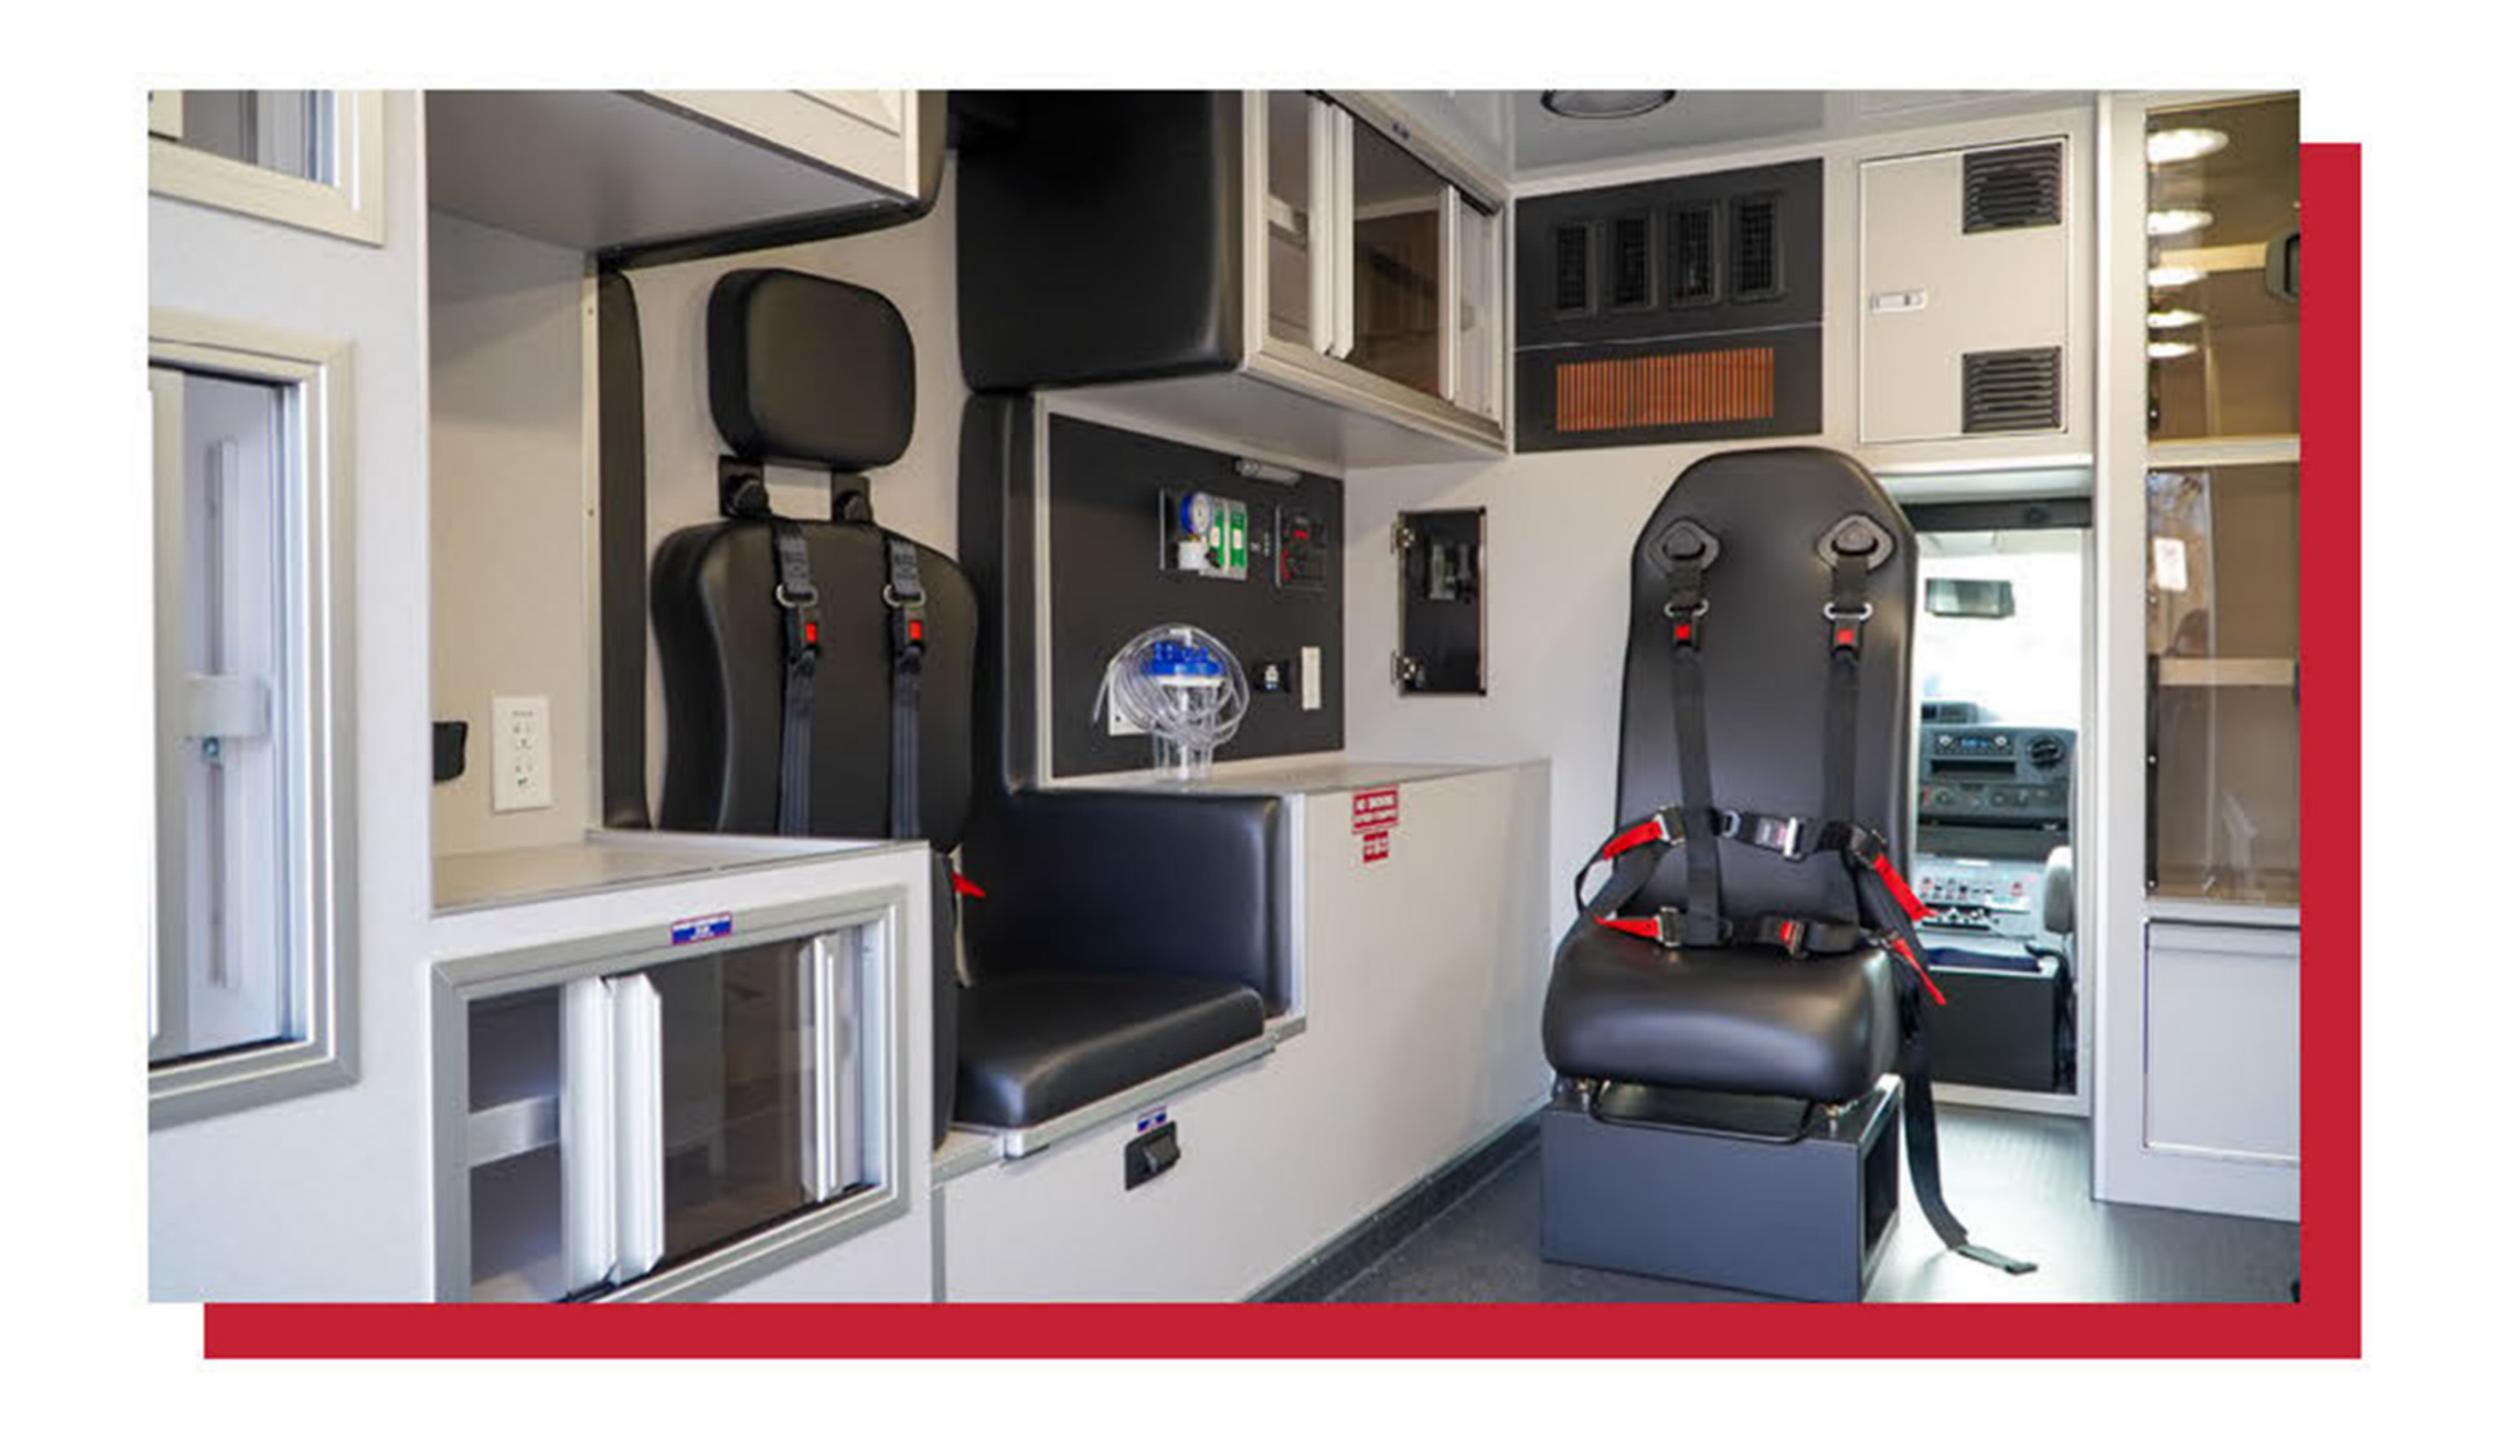

TYPE III - 166 UNITS

A versatile modular body with multiple floor plans to exceed the expectations of private, hospital-based, and municipal fire/EMS services. Get protection from the blazing heat and scene noise with high density foam insulation.

SERVICE

FESCO's gleaming 31,000 square foot main service facility includes 22+ bays & vehicle stalls, multiple permanent lifts and 6 sets of mobile lifts. The service facility is separated into three work zones for light, medium, and heavy-duty service and includes an indoor wash bay.

OUR SERVICE COMMITMENT

To do what's right, the right way, every time; and to resolve the issue before it becomes an emergency.

FESCO's Loaner Vehicle Service

As another FESCO value-added service, we maintain a fleet of 20 courtesy loaner cars to assist with vehicle transportation to and from our facility.

Our service experience went exactly as planned. FESCO completed the work in a timely manner and stayed in constant communication with me and my team. We had a very good experience overall.
