With the comfort of a car-like ride and a tight turning radius, the Type III remains a popular choice in today’s market. These van cutaway chassis offer a variety of headroom options and the ability to modify to suit your needs. Choice is not limited to just the exterior, as each model offers numerous compartment and cabinet configurations – from standard designs to fully-customized creations.

FORD

GMC / CHEVY

Horton Type III ambulances come standard with all of the features you know and trust to be part of the safest and highest-quality ambulance on the market:

- Superior construction, able to withstand a 90,000 pound load test
- More than 40 years of dynamic crash testing
- VI-Tech mounting to isolate vibration and noise
- Eight layers of insulation and sound suppression in the floor alone
- The most capable electrical system in the industry, Intelliplex i4G™
- HOPS for rollover protection
- Lowest cost of ownership\*

\* factoring in purchase price, maintenance costs, operating costs, uptime, life expectancy and resale value
