

Law Enforcement & Homeland Security Emergency Support Vehicles (ESV)

Customized Applications

Why settle for something when you can get an emergency response vehicle built specifically for your mission sensitive incidents. Hackney provides personalized custom designed bodies with a vast array of option choices, plus communications and AV integration capabilities.

➔ It's all about space

Seconds count – especially when lives are on the line. Hackney has pioneered emergency response vehicles that not only maximize storage capacity, but optimizes that space to provide instant access to vital equipment.

Compact Forensics or RIV cached equipment cabinets available for SUV applications.

- No cumbersome doors or door tracks protruding into the compartment door opening.
- Adjustable shelving track recessed into the sidewalls to maximize compartment width.
- LED track lighting recessed into sidewalls, providing incredible illumination while not impeding into storage space.
- Lower floors (below the frame level) available with up to 42" of depth creating more storage capacity without increasing the wheelbase and providing safe deployment of large, heavy equipment and even robots.
- Drop-down step platforms to facilitate safe and quick access to equipment stored in the top of the compartments.

ESU

Emergency Service Units

If your emergency response vehicle requires transporting lots of specialized equipment, then Hackney's ergonomically designed compartments provide the most useable and rapidly accessible available. Equipment that is large, heavy, bulky or

small and sensitive, can be sensibly organized by our design team.

The final design will provide for rapid deployment, easily accessible from ground level. Security can be provided by manual or electronic locking systems.

EOD

Explosive Ordnance Disposal

Custom designed EOD vehicles that provide rapid deployment of robots with environmentally controlled and isolated interior control room, logistics center, suit-up area and equipment and weapon

storage. Talk to a Hackney body design specialist and let us design a vehicle that meets your demanding requirements.

MCCU

Mobile Command & Control Units

Choose a chassis, body length, quantity of slide-out rooms and interoperability that meets your agencies requirements and budget.

Drop-down entrance step provides OSHA compliant entrance and exiting of the interior without a cumbersome setup.

MCCU

Mobile Command & Control Units

Custom designed interiors for command and control operations are available with left and right side slide-out rooms to vastly expand operational space. All cabinets are constructed of aluminum with full-length latches and powder-coated surfaces.

Counter tops are chip resistant solid-surface with bullnose edges. CAT6 network outlets are located throughout for interfacing computers, printers, TV/monitors, VoIP telephones, audiovisual recording devices, etc.

Full interoperable communications with perimeter networking is available with VSAT and/or cellular connectivity. Set up is fully automated and ready to receive and broadcast within minutes.
