Revision 1

--- ROSENBAUER AMERICA ----

To Whom It May Concern:

FESCO Emergency Sales (“FESCO”) is excited to represent Rosenbauer America throughout the mid-Atlantic region. FESCO recently joined forces with Rosenbauer for the Commonwealth of Virginia and Washington, D.C. FESCO has now added the states of Maryland and Delaware.

FESCO takes over in Maryland & Delaware for DPC Emergency Equipment. DPC retains the ability to continue warranty service and parts support for existing trucks through the 1-year warranty period. There are also a select number of documented, pre-approved vehicle sales that may be finalized by DPC until September 1, 2021. This is done for the benefit of customers and to ensure a seamless transition and to minimize any impact on customers. The same approach applies to Virginia where FESCO assumed responsibility from CW Williams that was announced previously.

Customers can now contact FESCO for service & parts support of their Rosenbauer apparatus. Please contact our Operations Manager, Marty Schlichting, at the toll-free number listed below or by emailing our Service & Parts teams at Service@fescosales.com or Parts@fescosales.com.

With more than 150 years of manufacturing experience, Rosenbauer is the global leader in firefighting technology and resources. Rosenbauer’s product offering in the United States serves every major category including 35 different models of aerial fire apparatus. Please contact FESCO to learn more about Rosenbauer’s broad product line of vehicles and extensive stock of demonstrator vehicles available for quick delivery.

Please direct all question regarding this notice to me at plaakejr@fescosales.com or by calling at 800-638-0926.

Respectfully,

Pete Laake, Jr.

President
